Fitting Your Custom Sleeves

Each earpiece is marked with red or blue detail. The red detail indicates the right hand earpiece with blue indicating the left. Remove your existing eartips from your earphones as per the manufacturer's instructions (Figure 1) and insert the earphones into your new custom sleeves noting the left and right orientation and ensuring the coloured detail is facing forward (Figure 2). Offer each earpiece up to the correct ear and guide it in (Figure 3). When seated correctly, the earpieces will feel comfortable and provide a noticeable reduction in outside noise. To ease insertion you can spread a small amount of the supplied cream on the tips of the earpieces, taking care not to obstruct the sound duct or bring it into contact with your earphones.
It may also be necessary to use a slight twisting motion as you push them into your ears to locate them correctly.
NEVER remove your earphones by pulling on the cable.

To clean your custom sleeves, gently remove the earphones and wash the sleeves in warm, soapy water. Dry thoroughly and refit to the earphones.
When not in use, always store the earpieces in the pouch provided.
