PACS PRO 26
Specification sheet

Class 3
SNR 26

PACS Pro 26 filter is designed for musicians and those in industry exposed to very high sound levels. For environments where an even level of protection is required over all frequencies. Used in music, motorsport, manufacturing, construction, plant worker and tradesmen.

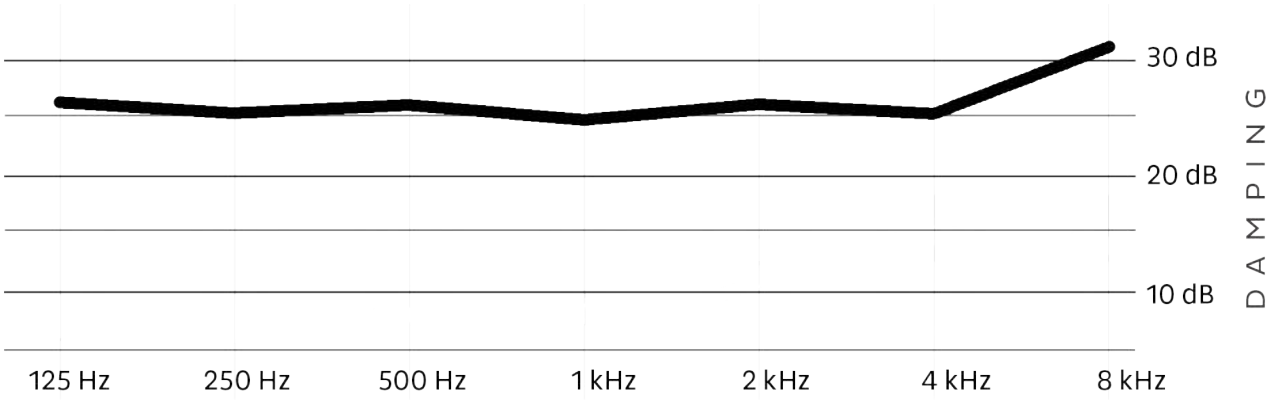

The PACS Pro 26 provides excellent flat attenuation across the whole frequency range, giving the user the most natural sounding protection possible whilst protecting from very high noise levels.
Protection from noise levels up to 110dB.

PACS Pro 26 (and/or differently branded equivalents with the exact same specs) has been tested and certified Class 3 Australian and New Zealand Standard for hearing protectors AS/NZS1270 and also the European standard 352-2.

Acoustic Specification

Minimum guaranteed damping level (dB)	125 Hz	250 Hz	500 Hz	1 kHz	2 kHz	4 kHz	8 kHz	H	M	L	Class SNR
AS/NZS1270:2002	17.2	18.3	18.7	20.6	20.8	15.5	27.8				Class 3
EN352-2	25	25	26	24	26	25	32	25	25	26	SNR 27

Attenuation Curve

Frequency

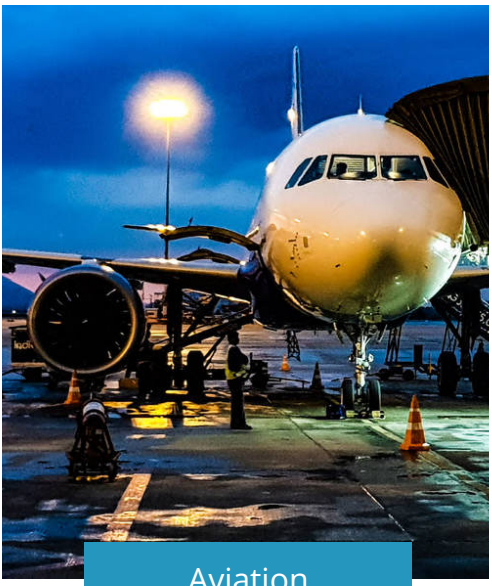

Weight	3g Net I 83g Gross I Average weight will vary according to ear size
Material	40 Shore Medical Grade Silicone
Type	Canal Mould
Colour Standard	Clear
Included Accessories	Instruction Manual, Wax Tool, Comfort Cream, Carry Case
Optional	Grip and/or Cord, Different Colours, Metal Detection Ball
Dimensions	110mm X 59mm X 36mm
Warranty	1 Year Limited Warranty against manufacturing and component failure

Tested to conform to AS/NZS1270:2002 standards.
Attenuation determined by PZT GmbH, Wilhelmshaven, Germany.

Natural sounding hearing protection - (PACS Pro 26)

The Pro 26 filter reduces the sound substantially while communication is still sounding natural. This filter is suitable for many different purposes. For pilots: The volume produced by aircraft will exceed the safe level of 85dB easily, but also the lower levels of noise from engines and rotors etc. can have damaging effects. Helicopter pilots need to communicate and protect their hearing at the same time. For industry: our custom canal moulds offer you the comfort and freedom to wear it for long a period of time. Drummers playing in loud bands prefer a higher protection level. The Pro 26, offers that high protection. The filters are interchangeable, so when a quieter gig is on, a different filter can be chosen.

For Who

- Musicians: Drummers
- Helicopter Pilots
- Construction
- Manufacturing
- Railway
- Trade Workers
- Maintenance workers
- Plant workers
- Contractor

Specifications

- Attenuation for environments up to 110dB
- Interchangeable filter moulds
- Certification: AS/NZS1270. European Standard for Earplug Hearing Protectors BS EN352-2 - PPE regulation (EU) 2016/425
- Custom silicone mould (canal)
- Extensive warranty
- Optional: metal detection ball, grip, cord, selected colours.
